Professional Summary

Professional Software Developer with over two years of experience building scalable Software platforms. Proficient in Python, Django with expertise in designing REST APIs, developing high-performance data pipelines, and optimizing search functionality. Experienced in cloud deployment (AWS, Google Cloud, Azure) and exploring AI solutions such as Retrieval-Augmented Generation (RAG) to enhance capabilities. Committed to delivering clean, scalable, and user-focused solutions.

Skills

Languages	Fluency: Python
Backend	Django, Django Rest Framework, RESTful API
Cloud & DevOps	Docker, AWS, Google Cloud, Azure, CI/CD, Git
AI/ML	Familiar with LangChain, RAG, Pinecone, vector Databases
Frontend	HTML, CSS, JavaScript, Bootstrap
Databases	MySQL, Postgres, SQLite
Methodologies	Agile, Scrum, Separation of Concerns

Experience

BINAIRY GmbH.

PYTHON / DJANGO DEVELOPER (REMOTE)

June 2023 – April 2024

- Developed and maintained backend systems using Python and Django, designing scalable and efficient web applications.
- Implemented performance optimization techniques, improving application responsiveness and overall system efficiency.
- Managed version control and CI/CD workflows using Git, ensuring smooth integration and reliable deployments.
- Collaborated with cross-functional teams to gather requirements and deliver robust backend solutions aligned with business needs.

ZEIGAL LTD.

PYTHON / DJANGO DEVELOPER (REMOTE)

January 2022 – May 2023

- Designed and developed full-stack web applications using Django, ensuring scalability, maintainability, and clean architecture.
- Built and integrated RESTful APIs and third-party services to extend application functionality and improve system interoperability.
- Deployed and managed applications on Google Cloud Platform (GCP) Compute Engine, ensuring high availability and reliability.
- Optimized backend performance and database interactions to support efficient data processing and seamless user experience.
- Collaborated with stakeholders and designers to translate business requirements into technical solutions.

Projects

Time Capture

BACKEND DEVELOPER

Developed an NFC-based employee and office management platform with web and mobile access, enabling efficient time tracking and organizational operations.

FlowForge (Multi-Tenant Project Management System)

BACKEND DEVELOPER

Engineered a scalable multi-tenant SaaS backend using Django and Django REST Framework, implementing organization-based data isolation and role-based access control. Designed secure JWT authentication and developed optimized RESTful APIs with advanced features including filtering, search, pagination, and request throttling. Improved performance through database query optimization (select_related, prefetch_related) and indexing strategies, ensuring efficient data handling for projects and tasks management.

Lead Hunter

BACKEND DEVELOPER

Built a lead generation application using Django and Next.js, integrating with GoHighLevel CRM to extract, process, and automatically sync selected data.

Certification

Programming for Everybody (Getting Started with Python)

Michigan University

Introductory course on Python programming, covering fundamentals and practical applications

Programming fundamentals Practices

Duke University

Introduction to programming concepts, problem-solving, and algorithmic thinking

Education

Technische Universität Cottbus-Senftenberg, Cottbus Germany

MSc. Artificial Intelligence

2024 – present

University Of Engineering & Technology (Uet), Taxila

B.S Computer Science

2017 - 2021
